FX Energy to Present at EnerCom's Oil & Services Conference VIII

Salt Lake City, February 11, 2010 – **FX Energy, Inc.** (NASDAQ: FXEN) announced today that David N. Pierce, the Company's President and CEO will make a presentation at EnerCom's Oil & Services Conference VIII in San Francisco on February 17, 2010. The presentation is scheduled for 7:00 p.m. Eastern Time; 4:00 p.m. Pacific and will be webcast. A link to the webcast will be available on the homepage of the FX Energy website at www.fxenergy.com. For those unable to participate during the live webcast, the presentation will also be available for replay on the company's website.

About FX Energy

FX Energy is an independent oil and gas exploration and production company with production in the US and Poland. The Company's main exploration activity is focused on Poland's Permian Basin where the gas-bearing Rotliegend sandstone is a direct analog to the Southern Gas Basin offshore England. The Company trades on the NASDAQ Global Market under the symbol FXEN. Website www.fxenergy.com

FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements. Forward-looking statements are not guarantees. For example, exploration, drilling, development, construction or other projects or operations may be subject to the successful completion of technical work; environmental, governmental or partner approvals; equipment availability, or other things that are or may be beyond the control of the Company. Operations that are anticipated, planned or scheduled may be changed, delayed, take longer than expected, fail to accomplish intended results, or not take place at all.

In carrying out exploration it is necessary to identify and evaluate risks and potential rewards. This identification and evaluation is informed by science but remains inherently uncertain. Subsurface features that appear to be possible traps may not exist at all, may be smaller than interpreted, may not contain hydrocarbons, may not contain the quantity or quality estimated, or may have reservoir conditions that do not allow adequate recovery to render a discovery commercial or profitable. Forward-looking statements about the size, potential or likelihood of discovery with respect to exploration targets are certainly not guarantees of discovery or of the actual presence or recoverability of hydrocarbons, or of the ability to produce in commercial or profitable quantities. Estimates of potential typically do not take into account all the risks of drilling and completion nor do they take into account the fact that hydrocarbon volumes are never 100% recoverable. Such estimates are part of the complex process of trying to measure and evaluate risk and reward in an uncertain industry.

Forward-looking statements are subject to risks and uncertainties outside FX Energy's control. Actual events or results may differ materially from the forward-looking statements. For a discussion of additional

contingencies and uncertainties to which information respecting future events is subject, see FX Energy's SEC reports or visit FX Energy's website at www.fxenergy.com.
